MailMeter Compliance Solution for Microsoft Office 365™ & Gmail

MailMeter Cloud is a next generation unified eDiscovery, archiving and compliance solution for Microsoft Office 365 and Gmail. MailMeter Cloud is fully hosted in Microsoft GDPR Compliant Azure Data Center (or we can deploy on premise) and enables organizations to gain full control of their email compliance archiving requirements. We enable you to maximize your existing investment in Office 365 or Gmail, while filling the compliance gap for users with a cost effective alternative to E3, E5 and Google Vault plans. So, whether you are moving to, or already on Office 365 or Gmail, MailMeter Cloud will eliminate the complication and cost of holding onto Inactive mailbox licenses through our History Capture, as well as importing any legacy PST or MBOX files.

MY MAILMETER

MailMeter also gives you the option of providing your end-users with a powerful search tool that allows them to search their own personal email archive of any email they have ever sent or received. For end users, it's like having an unlimited inbox with fast, intelligent search features. Never again have users opening support tickets for assistance with finding a deleted or lost email.

BENEFITS

COMPLIANCE & POLICY ENFORCEMENT

Intelligent email archiving, message tagging, annotations, export to multiple formats all via a consistent intuitive interface.

AVOID SINGLE VENDOR DEPENDENCY

MailMeter Cloud provides a separate repository for your eDiscovery outside of your email tenant.

SEARCH, EDISCOVERY AND INVESTIGATION

Easier and faster way to access your data. Removes the complexity in conducting searches.

COST EFFECTIVE

MailMeter Cloud is a cost effective add on to your E1 subscription and an alternative to the E3 and E5 plans.

RETENTION MANAGEMENT

MailMeter Cloud can protect individual messages from deletion. Instead of a hold on a user you can just hold specific messages.

MS OFFICE 365™ & GMAIL

Help eliminate the complication and cost of holding onto inactive mailbox licenses through our History Capture, as well as importing any legacy PST files.

Compliance Review

The MailMeter Compliance Review feature provides an advanced Web interface for compliance officers who need to ensure compliance with regulations such as GDPR, FOIA, CCPA, GLBS and Basel II. With MailMeter Compliance Review you can easily monitor email usage and identify inappropriate use of the email system based on predefined rules that you set up. Email containing financial terms, inappropriate language, dangerous or threatening words or even trade secrets can be flagged and sent to a compliance officer for review. MailMeter Compliance Review can generate reviews daily, weekly, monthly or for specific time periods.

WHY MAILMETER CLOUD?

- No Hardware or software to maintain and manage
- Unified eDiscovery and Compliance regardless of mix of O365 or Google plans
- Separate repository for your eDiscovery outside of your email tenant
- Respond to Data Subject Access Requests (DSAR) promptly.
- Retention Management to meet GDPR requirements.
- Scalable - resourced to meet your organizations individual needs
- Cost effective – no need to upgrade to E3, E5 or Google Vault
- Data Sovereignty – region closest to your organization
- Easy Set-up. Be up and running in one day!

MAILMETER CLOUD IS SECURE!

- Runs in GDPR Compliant Microsoft Azure Data Centers.
- Encrypted communications between Office 365/Gmail and MailMeter Cloud.
- Real-time 24x7 Monitoring
- SSL Web Access

BROAD RANGE OF SERVICES

- Migration from premise MailMeter
- Office 365 History Capture
- PST, MBOX and EML Import
- Export Services

INVESTIGATE

MailMeter CLOUD gives you an advanced investigative interface made specifically for organizations that need to perform frequent in-depth searching and analysis for evidentiary discovery on past email activity, email messages and attachments. It offers group searching, tagging and export capabilities. MailMeter Investigate gives you the tools you need to search through millions of email messages in seconds, reducing the time to find documents and saving you both time and money.

Searches can be made by Time, Subject, Message Content, Attachment Content as well as conversations between individuals or between groups of people. Searches can be saved and previous searches can be re-executed. MailMeter Cloud can do Boolean, proximity, fuzzy, boosted searches and more.
