### WEBINARS

## Is WORM Technology the missing piece in your ransomware defense?

Guest Speakers: **Bob Ralston & Lorcan Kennedy, Waterford Technologies**

Date: **October 28th, 2020**

Time: **On-demand**

Organisations globally are experiencing a high incidence of phishing attacks, malware and ransomware attacks leading to a significant increase in endpoint remediation costs. Information and security professionals are finding themselves continually defending against a rapidly evolving and increasingly sophisticated threat landscape that exploits outdated technologies. Don't let ransomware lock down your critical data assets and potentially shut down your operations.

Join our 25-minute webinar to find out how backing up data to secure WORM storage is the best line of defence against ransomware.

## Microsoft Office 365 Outage

Microsoft has suffered a second major outage within three days. It is extremely troubling to see two Office 365 outages in such a short period that appear to be the result of software code changes. The outage impacted Teams, Office 365 and Outlook. After the issue emerged, users who tried to log into the systems were unable to connect. During the pandemic, many users have been relying on online services to continue working. In these situations, having an email archive like MailMeter makes good business sense, end users have access to their email archive 24/7.

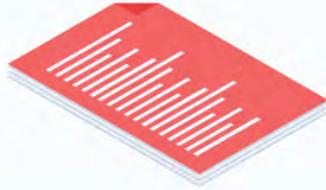

MailMeter allows you to have access 24/7 to every single email in your organisation. Waterford Technologies gives our clients the visibility they need for effective monitoring, eDiscovery, auditing, and reporting across a variety of data regulation standards. MailMeter empowers you to easily reduce email risk, detect and respond in real-time to threats.
