## MAILMETER CLOUD

MailMeter Cloud is a next generation unified eDiscovery, archiving and compliance solution for Microsoft Office 365™ and Gmail. MailMeter Cloud is fully hosted in Microsoft GDPR Compliant Azure Data Center (or we can deploy on premise) and enables organisations to gain full control of their email compliance archiving requirements. We enable you to maximize your existing investment in Office 365™ or Gmail, while filling the compliance gap for users with a cost effective alternative to more expensive plans. So, whether you are moving to, or already on Office 365™ or Gmail, MailMeter Cloud will eliminate the complication and cost of holding onto Inactive mailbox licenses though our History Capture, as well as importing any legacy PST or MBOX files.

## IF YOU ALREADY HAVE MICROSOFT OFFICE 365™ OR GMAIL WE CAN HELP...

Office 365™ and Gmail are fantastic products, but why not make them even better by enhancing the current offering by adding MailMeter. It is beneficial and more cost effective to use an Email Archiving Solution to protect your data and your reputation.

MailMeter Cloud ensures you have the ability to locate, manage, monitor, protect & minimise data and provides peace of mind that data requests are conducted in an efficient & timely manner.

Making the move to Office 365™ or Gmail should not be taken lightly, there are a lot of considerations to be made when moving your organisations valuable email data to the cloud, for instance, security, data integrity and business continuity risks.

Whether you are about to move to the cloud or have already moved a 3rd party solution is essential in ensuring your organisation is not left exposed!

## WHY MAILMETER CLOUD

- Unified eDiscovery and Compliance regardless of mix of O365 or Google plans.

- Cost effective – no need to upgrade to E3, E5 or Google Vault.

- Easy to use & set-up. Be up and running in one day!

- No Hardware or software to maintain and manage.

- Automated Retention Management.

- Separate repository for your eDiscovery outside of your email tenant.

- Scalable - resourced to meet your organisations individual needs.

- Data Sovereignty – region closest to your organisation.

- Respond to FOI & Data Subject Access Requests (DSAR) promptly.

- Tamper proof archive to ensure integrity.

# BENEFITS

## COST EFFECTIVE:

MailMeter Cloud is a cost-effective add on to your current O365 subscription and an alternative to the E3 and E5 plans without the requirement for expensive compliance add ons. Use the licenses you have and only change when you need to.

## "EGGS IN ONE BASKET"

Avoid single vendor dependency, MailMeter will provide you with a separate repository for eDiscovery outside of your email tenant.

## SIMPLICITY

Our motto is 'keep it simple'; that ethos is in how we work with you, how our solutions are deployed, how you get support and how to use our products. And if you need us to do it for you, we will. – other systems are overly complex, are you sure you will be comfortable to use them when needed? Our goal is easier and faster ways to access your data.

## MAILMETER AND O365 SEARCH & COMPLIANCE COMPARISON

We can provide you with a comprehensive document which compares conducting a search in MailMeter versus O365 & it also includes a comparison of setting up Retention Policies. The challenges in getting easy and quick access to the data are apparent in O365.

## "ONE SIZE DOES NOT FIT ALL"

Mix and match O365 Licenses to suit your business. With MailMeter all messages are archived regardless of the users' O365 license, which enables full eDiscovery & Compliance regardless of the O365 license, so no need for expensive upgrades.

## MY MAILMETER

End-users can quickly, easily, securely & remotely search their email in the archive for any email they have ever sent or received, even if deleted in mailbox.

## MANAGE DATA GROWTH

By using MailMeter for automated archiving you can lower your storage usage costs in O365, as you can apply a strict retention policy on O365 (1,2 or 3 year Policy) and use MailMeter as your secure GDPR archive.

## RETENTION MANAGEMENT

Protect individual messages from deletion. In addition to putting a hold on a user or users, you can just hold specific messages through the use of "tags".

## MANAGED SERVICE

We do not just provide you with the Software, we provide the tool-set to completely manage email and file Data with the support of our team of Data Management experts.

- Installation, Implementation and Setup
- Project Management
- Future Planning Collaboration
- FOI and eDiscovery Assistance
- Dedicated Account Management Team
- Real-Time 24×7 Monitoring
- Extended Support Hours

*"I've been extremely grateful for all the support Waterford Technologies have given over the past few months, with special thanks to Kevin who supported me on Xmas Eve, Rory in the last few weeks for the retention and space issues and finally Mark and Paul in helping me get through our e-discovery. MailMeter has played an integral role in the council's ability to organise, securely store and find historical email".*

**Paul Quinn**
Dunlaoighre Rathdown, County Council

## MAILMETER CLOUD IS SECURE

MailMeter will capture, encrypt, compress and digitally stamp all emails in real-time and provide file indexing, enabling business intelligence. MailMeter ensures a tamper-proof archive containing a legally compliant copy of all email to maintain integrity. MailMeter & SISCIN runs in GDPR Compliant Microsoft Azure Data Centers. Encrypted communications between Office 365™ and MailMeter Cloud. Real-time 24x7 monitoring by Waterford Technologies Team.
