## Microsoft Price Increases

Microsoft announces price increase for Office 365 and Microsoft 365. The price increases will affect commercial and business users of Microsoft's software as a service (SaaS) offering next year. Organisations can avoid upgrades to higher O365 plans & additional advanced compliance by utilising a third-party email archiving solution.

MailMeter provides full eDiscovery regardless of the Office 365 license, so no need for expensive upgrades. Most of the time MailMeter costs less than what you are paying to just Backup your mailbox. For more information click below.
